

RLM OTR WHEEL DOLLY

"Proudly Australian Made"

- To assist with the fitment and removal of heavy OTR wheel assemblies on mine site vehicles.
- To assist with manual handling of OTR wheel assemblies in or around the workshop.
- Designed for tyre sizes -: 1400R x 25" or 385/95R x 25".

The H1000 OTR wheel dolly has the same operating features as a pallet jack, with a hydraulic load lift of 1000Kg, the heavy duty ball bearing wheels allows for smooth movement with minimum effort, while the pallet jack style steering arm offers excellent direction and load control.

The tyre / wheel lifting arms have large ball bearing rollers, to allow for easy tyre rotation and wheel stud alignment during vehicle fitment. The tyre / wheel assembly is secured on the rollers by Four drop in – lift out stabilizer bars.

- H/Duty steel construction, powder coated for weather protection.
- All moving parts have serviceable quality grade bearings.
- RLM offer back up support – service and spare parts.
- H1000 model is designed for a **firm, even and level** surface only.
- For broken uneven ground we offer our H1000RT Rough Terrain model.
