

RLM- Rough Terrain OTR Wheel Dolly

“Developed in Australia”

- To assist with the fitment and removal of heavy OTR wheel assemblies on mine site vehicles.
- To assist with manual handling of OTR wheel assemblies in or around the workshop.
- Designed for tyre sizes -: 1400R x 25” or 385/95R x 25”.

The H1000RT OTR wheel dolly has the same operating features as a pallet jack, with a hydraulic load lift of 1000Kg, the large pneumatic wheels allow for easy movement over broken, uneven or gravel surfaces with minimum effort, while the pallet jack style steering arm offers excellent direction and load control.

The tyre / wheel lifting arms have large ball bearing rollers, to allow for tyre rotation and wheel stud alignment during vehicle fitment. The tyre / wheel assembly is secured on the roller arms by Four drop in – lift out stabilizer bars.

- H/Duty steel construction, surface coated for weather protection.
- All moving parts have serviceable quality grade bearings.
- RLM offer back up support – service and spare parts.
- H1000RT model is designed for an uneven but level surface.
- For hard stand, even surface we offer our H1000 OTR model.

Supplier of Tyre and Wheel Servicing Products Since 1982.
